---

Bill - I'm getting ready to go on leave. Can you help on this and send a reply?

thanks very much

Meredith

Possible for your branch to answer Mr. El Damir's questions? Thank you. Elizabeth

Hi Elizabeth:

I was reading on the EPA website the following, but i needed more explanation. What do you mean by

- Each retail unit must include a bait station.
- Bait refills may be sold with bait stations in a single retail unit.

Can we sell 2nd or 1st generation rodenticide to walk in clients using pre-load stains.

### **Summary of New Restrictions**

#### **“Consumer Size” Products (Products containing $\leq 1$ pound of bait)**

- May not contain brodifacoum, difethialone, bromadiolone, or difenacoum (the second-generation anticoagulants).
- Loose bait forms such as pellets are prohibited.
- Each retail unit must include a bait station.
- Bait refills may be sold with bait stations in a single retail unit.
- All outdoor above ground use must be in a bait station and be applied within 50 feet of buildings.
